**Queen Of My dream** 2012-05-01 immunoregulation is one of the areas which has witnessed the most explosive advances of immunology during the past decade it is in this area that the current view of the immune system has arisen and developed there is indeed little doubt that immune reactions are primarily determined by messages which are generated within the immune system and passed among different types of immunologic cells this cell communication not only determines the type intensity and duration of the response after perturbation of the immune system by exogenous antigens but it is also essential for preventing autoimmune reactions and their clinical consequences in order to assure a perfect balance within the enormous complexity of the immune system it is not surprising that multiple self regulatory mechanisms are organized at different levels such as antibody feedback idiotypic anti idiotypic responses suppressor and helper t cells lymphokine signals and genetic requirements a number of observations in recent years have however demonstrated that consistent contributions to the immunological homeostasis are given also by signals generated outside of the immune system namely in the central and autonomous nervous system as well as in the endocrine apparatus furthermore the interactions between the immune system and the other body homeostatic mechanisms seem to be bidirectional if immunological cells may be targets of neuroendocrinological factors immunological products seem in turn to contribute to the neuro endocrine homeostasis

**The Lolita Effect** 2011 in this remarkably candid book the author has taken a hard look at pakistan in his words our difficult neighbour and analysed the reasons as to why the two countries have never been friends and probably will not be in the future at least not in the immediate one the author attributes

india s failure to neutralise pakistan to its kind of near constant gandhian passive approach to india s security interests the author believes that the future of muslims in india is bright and that it would be quite a lusterless country without them it is a matter of time before india has its first muslim prime minister but this will happen when the latter represents interests of all indians and not merely those of the muslims his study of muslims is spread of a wide range of inter related perspectives what has been written comes through the author s personal knowledge not through any ideological prism and also secondary observations of other people and least of all through rose tinted glasses he has spared no one who he believes is guilty of committing crimes against the nation it is a passionate book that ends on an optimistic note

*Total Fitness* 2018 the quran literally meaning the recitation also romanised koran is the central religious text of islam which muslims believe to be a revelation from god arabic allah it is widely regarded as the finest piece of literature in the arabic language muslims consider the quran to be the only book that has been protected by god from distortion or corruption quranic chapters are called suras and verses are called ayahs muslims believe that the quran was verbally revealed from god to muhammad through the angel gabriel jibril gradually over a period of approximately 23 years beginning on 22 december 609 ce when muhammad peace be upon him was 40 and concluding in 632 ce the year of his death shortly after muhammad s death the quran was collected by his companions using written quranic materials and everything that had been memorized of the quran muslims regard the quran as the most important miracle of muhammad the proof of his prophet hood and the culmination of a series of divine messages that started with the messages revealed to adam and ended with muhammad the quran assumes familiarity with major narratives recounted in the jewish and christian scriptures it summarizes some dwells at length on others

and in some cases presents alternative accounts and interpretations of events the quran describes itself as a book of guidance it sometimes offers detailed accounts of specific historical events and it often emphasizes the moral significance of an event over its narrative sequence the quran is used along with the hadith to interpret sharia law during prayers the quran is recited only in arabic someone who has memorized the entire quran is called a hafiz some muslims read quranic ayahs verses with elocution which is often called tajweed during the month of ramadan muslims typically complete the recitation of the whole quran during tarawih prayers inimitability of the quran or i jaz is the belief that no human speech can match the quran in its content and form the quran is considered an inimitable miracle by muslims effective until the day of resurrection and thereby the central proof granted to muhammad in authentication of his prophetic status the concept of inimitability originates in the quran where in five different verses challenges opponents to produce something like the quran if men and sprites banded together to produce the like of this quran they would never produce its like not though they backed one another 17 88 so the suggestion is that if there are doubts concerning the divine authorship of the quran come forward and create something like it from the ninth century numerous works appeared which studied the quran and examined its style and content medieval muslim scholars including al jurjani d 1078ce and al baqillani d 1013ce have written treatises on the subject discussed its various aspects and used linguistic approaches to study the quran others argue that the quran contains noble ideas has inner meanings maintained its freshness through the ages and has caused great transformations in individual level and in the history some scholars state that the quran contains scientific information that agrees with modern science the doctrine of miraculousness of the quran is further emphasized by muhammad s illiteracy since the unlettered prophet could not have been suspected of composing the quran
