stereotypical descriptions showcase west germany as an economic miracle or cast it in the narrow terms of cold war politics such depictions neglect how material hardship preceded success and how a fascist past and communist sibling complicated the country's image as a bastion of democracy even more disappointing they brush over a rich and variegated cultural history that history is told here by leading scholars of german history literature and film in what is destined to become the volume on postwar west german culture and society in it we read about the lives of real people from german children fathered by black occupation soldiers to communist activists from surviving jews to turkish guest workers from young hoodlums to middle class mothers we learn how they experienced and represented the institutions and social forces that shaped their lives and defined the wider culture we see how two generations of west germans came to terms not only with war guilt division from east germany and the angst of nuclear threat but also with changing gender relations the americanization of popular culture and the rise of conspicuous consumption individually these essays peer into fascinating overlooked corners of german life together they tell what it really meant to live in west germany in the 1950s and 1960s in addition to the editor the contributors are volker r berghahn frank biess heide fehrenbach michael geyer elizabeth heineman ulrich herbert maria höhn karin hunn kaspar maase richard mccormick robert g moeller lutz niethammer uta g poiger diethelm prowe frank stern arnold sywottek frank trommler eric d weitz juliane wetzel and dorothee wierling

since unification german culture has experienced a boom in discourses on generation family and place linda shortt reads this as symptomatic of a wider quest for belonging that mobilises attachment to counter the effects of post modern deterritorialisation and globalisation investigating twenty first century narratives of belonging by reinhard jirgl christoph hein angelika overath florian illies juli zeh stephan wackwitz uwe timm and peter schneider shortt examines how the desire to belong is repeatedly unsettled by disturbances of lineage and tradition in this way she combines an analysis of supermodernity with an enquiry into german memory contests on the national socialist era 1968 and 1989 that continue to shape identity in the berlin republic exploring a spectrum of narratives that range from agitated disavowals of place to romances of belonging this study illuminates the topography of belonging in contemporary germany

a sustained and systematic study of the construction erosion and reconstruction of national histories across a wide variety of states is highly topical and extremely relevant in the context of the accelerating processes of europeanization and globalization however as demonstrated in this volume histories have not of course only been written by professional historians drawing on studies from a number of different european nation states the contributors to this volume present a systematic exploration of the representation of the national paradigm in doing so they contextualize the european experience in a more global framework by providing comparative perspectives on the national histories in the far east and north america as such they expose the complex variables and diverse actors that lie behind the narration of a nation

this book is open access under a cc by 4 0 license this book provides a profound insight into post war mostar and the memories of three generations of this bosnian herzegovinan city drawing on several years of ethnographic fieldwork it offers a vivid account of how personal and collective memories are utterly intertwined and how memories across the generations are reimaged and rewritten following great socio political change focusing on both bosniak dominated east mostar and croat dominated west mostar it demonstrates that even in this ethno nationally divided city with its two divergent national historiographies generation specific experiences are crucial in how people ascribe meaning to past events it argues that the dramatic and often brutal transformations that bosnia and herzegovina has witnessed have led to alterations in memory politics not to mention disparities in the life situations faced by the different generations in present day post war mostar this in turn has created variations in memories along generational lines which affect how individuals narrate and position themselves in relation to the country s history this detailed and engaging work will appeal to students and scholars of anthropology sociology political science history and oral history particularly those with an interest in memory post socialist europe and conflict studies

in german cinema terror and trauma since 1945 thomas elsaesser reevaluates the meaning of the holocaust for postwar german films and culture while offering a reconsideration of trauma theory today elsaesser argues that germany s attempts at mastering the past can be seen as both a failure and an achievement making it appropriate to speak of an ongoing guilt management that includes not only germany but europe as a whole in a series of case studies which consider the work of konrad wolf alexander kluge rainer werner fassbinder herbert achterbusch and harun farocki as well as films made in the new century elsaesser tracks the different ways the holocaust is present in german cinema from the 1950s onwards even when it is absent or referenced in oblique and hyperbolic ways its most emphatically absent presence might turn out to be the compulsive afterlife of the red army faction whose acts of terror in the 1970s were a response to as well as a reminder of nazism s hold on the national imaginary since the end of the cold war and 9 11 the terms of the debate around terror and trauma have shifted also in germany where generational memory now distributes the roles of historical agency and accountability differently against the background of universalized victimhood a cinema of commemoration has if anything confirmed the violence that the past continues to exert on the present in the form of missed encounters retroactive incidents unintended slippages and uncanny parallels which elsaesser reviving the full meaning of freud s fehllleistung calls the parapractic performativity of cultural memory

this is a history of 1968 written from a new perspective that of center right student activists in west germany based on oral history interviews and new archival sources it examines the ideas experiences and repertoires of center right students in this age of protest writing these activists back into the history of 1968 and its afterlives including student protest cultural revolt internationalism debates about left wing violence and the terror of the red army faction the memory wars of the 1980s and beyond reveals that this was a broader more versatile and ultimately more consequential phenomenon than the traditionally narrower focus on a left wing minority allows other 68ers demonstrates that we need a more nuanced history of the 1968 generation and of generational conflict during these years student activists comprised individuals from across the political spectrum who often had very different ideas about what kind of a society they envisaged and how to address the shortcomings of west german democracy 1968 was a moment of intense political conflict but it also played out within the student body and nurtured contrasting identities this book shows that the center right involvement in 1968 had real consequences many of the protagonists of this book would go on to pursue high profile political careers and leave their mark on west german political culture other 68ers therefore sheds fresh light on how west germany s center right dealt with the crisis of hegemony and political identity it experienced in the wake of 1968 how it coped with generational change how it transformed and modernized after losing power at the national level for the first time in 1969 and how it managed to re emerge so successfully in the 1980s

from the rise of terrorism to the uncertainties associated with economic crisis and recession our age is characterized by fear fear is the expression of a society on unstable foundations most of us feel that our social status is under threat and our future prospects in jeopardy we are overwhelmed by a sense of having been catapulted into a world to which we no longer belong tracing this experience of fear heinz bude uncovers a society marked by disturbing uncertainty suppressed anger and quiet resentment this is as true in our close relationships as it is in the world of work in how we react to politicians as much as in our attitudes towards bankers and others in the financial sector bude shows how this fear is not derived so much from a powerful other but rather from the seemingly endless range of possibilities which we face while this may seem to offer us greater autonomy and freedom in reality the unknown impact and meaning of each option creates a vacuum which is filled by fear what conditions lead people to feel anxious and fearful for themselves and others how can individuals withstand fear and develop ways of making their fears intelligible probing these and other questions bude provides a fresh analysis of some of the most fundamental features of our societies today

this introductory book provides an insight into sociological life course research and informs about its theoretical assumptions analytical concepts and main results sociological life course research like biographical research has developed into an independent and fruitful field of research since the end of the 1960s it is true that half a century earlier in their famous study of the polish peasant in europe and america 1918 20 thomas and znaniecki had already used life records to examine the connection between social change social structures and the life histories of individuals however such a research perspective was supplanted by other methodological conceptual approaches to empirical social research for over fifty years it was not until the 1960s that sociological interest in life course and biographical theoretical issues reawakened today life course research is considered one of the most important conceptual innovations in sociology in recent decades the content the life course as a social construction what is life course research the life course as an institution collective life courses generations cohorts and social change structures of the life course life course research a conceptual perspective life course research quo vadis the author prof dr matthias wingens teaches sociology at the university of bremen bremen international graduate school of social sciences bigsss

this book examines the paradox of collective identity in eastern germany in the wake of german reunification following the fall of the berlin wall citizens of the former german democratic republic were confronted with a dilemma were they already germans without qualification like their compatriots in the west or did they remain east germans for the time being with an identity tied to their distinct past as if they were foreigners who had migrated without leaving home how memory divides shows that these questions remain unresolved even today less because of any incomplete unity between germans in west and east than because of the contradictory ways in which easterners themselves have remembered their past drawing on a unique study spanning two decades the author reveals how divergent biographical memories have given rise to life stories with a diverse array of genres and storylines at odds with official accounts of the gdr and its demise over time efforts to effect unity between west and east have reproduced divisions within the east this book will appeal to scholars and students of sociology and politics with interests in memory heritage and identity

radical evil the second volume in the s series marks the two hundredth anniversary of the publication of kant s religion without the limits of reason alone where kant first proposed and quickly withdrew in horror the concept of radical evil an evil at the very heart of the ethical problematic it also marks the recent publication in english of lacan s ethics of psychoanalysis arguably one of the most important and influential of lacan s seminars in which he discusses the rise since the nineteenth century of a certain happiness in evil the events

of the twentieth century have made the assertions of both lacan and kant credible and concrete the holocaust and the attempts to cast doubt on its existence the rise of racism worldwide the engagement by philosophers with ethics as critical to relevant issues but without the consideration of the problems which lead kant to his formation of radical evil the contributors to this volume were asked to consider radical evil in its philosophical political and cultural dimensions what emerges is a clear introduction to the problematic including discussions of the holocaust the placement of homosexuals in concentration camps the creation of the machiavellian in politics and literature a full and fascinating exploration of the radical nature of modern evil

a deep exploration of the rise reign and legacy of the third reich for its brief existence national socialist germany was one of the most destructive regimes in the history of humankind since that time scholarly debate about its causes has volleyed continuously between the effects of political and military decisions pathological development or modernity gone awry was terror the defining force of rule or was popular consent critical to

sustaining the movement were the german people sympathetic to nazi ideology or were they radicalized by social manipulation and powerful propaganda was the final solution the motivation for the third reich s rise to power or simply the outcome a companion to nazi germany addresses these crucial questions with historical insight from the nazi party s emergence in the 1920s through its postwar repercussions from the theory and context that gave rise to the movement through its structural cultural economic and social impacts to the era s lasting legacy this book offers an in depth examination of modern history s most infamous reign assesses the historiography of nazism and the prehistory of the regime provides deep insight into labor education research and home life amidst the third reich s ideological imperatives describes how the third reich affected business the economy and the culture including sports entertainment and religion delves into the social militarization in the lead up to war and examines the social and historical complexities that allowed genocide to take place shows how modern day germany confronts and deals with its recent history today s political climate highlights the critical need to understand how radical nationalist movements gain an audience then followers then power while historical analogy can be a faulty basis for analyzing current events there is no doubt that examining the parallels can lead to some important questions about the present exploring key motivations environments and cause and effect this book provides essential perspective as radical nationalist movements have once again reemerged in many parts of the world

in the spring of 1945 as the german army fell in defeat and the world first learned of the unspeakable crimes of the holocaust few would have expected that only half a century later the germans would emerge as a prosperous people at the forefront of peaceful european integration how did the germans manage to recover from the shattering experience of defeat in world war ii and rehabilitate themselves from the shame and horror of the holocaust in after hitler konrad h jarasch shows how germany's determination to emphasize civility and civil society destroyed by the nazi regime helped restore the demoralized nation during the post war period unlike other intellectual inquiries into german efforts to deal with the nazi past after hitler primarily focuses on the practical lessons a disoriented people drew from their past misdeeds and their struggle to create a new society with a sincere and deep commitment to human rights after hitler offers a comprehensive view of the breathtaking transformation of the germans from the defeated nazi accomplices and holocaust perpetrators of 1945 to the civilized democratic people of today's germany

during the twentieth century german government and industry created a highly skilled workforce as part of an ambitious program to control and develop the country s human resources yet these long standing efforts to match as many workers as possible to skilled vocations and to establish a system of job training have received little scholarly attention until now the author s account of the broad support for this program challenges the standard historical accounts that focus on disagreements over the german political economic order and points instead to an important area of consensus these advances are explained in terms of political policies of corporatist compromise and national security as well as industry s evolving production strategies by tracing the development of these policies over the course of a century the author also suggests important continuities in germany s domestic politics even across such different regimes as imperial weimar nazi and post 1945 west germany
