Handbook of Research on Challenges for Human Resource Management in the COVID-19 Era

2022-06-10

the world was dealt a blow that included a pandemic and economic crisis as well as racial unrest initiating an energized charge for social justice advocacy the united states is currently facing an unprecedented challenge in ensuring that all citizens live in a fair inclusive and opportunity rich society these issues have heightened questions about racial justice that have been placated but can no longer be ignored marginalized communities cannot thrive if they continue to be oppressed neglected disinvested and isolated from economic opportunity the culture of allyship needs to be enacted thoughtfully and not performatively to create sustainable change through a critical mass of engaged advocates and activists many organizations enable the status quo by not confronting issues around race gender and equity leaders of color want a seat at the table as highly valued contributors for the transformation of a just and equitable america by listening to the voices of black and brown leaders the promotion of change in an era of social unrest will finally occur black and brown leadership and the promotion of change in an era of social unrest amplifies the voices of leaders who identify as black latinx indigenous or people of color as they navigate leadership during a time of tumultuous change and social unrest more specifically it portrays dilemmas that marginalized communities encounter while advocating for justice and social change within whitestream organizational systems the chapters delve into the definitions perceptions and lived experiences of americanism identity otherness and racism as it relates to leadership and discusses the issues dilemmas struggles and successes that persons of color experience in leadership roles in business and education this book is valuable for practitioners and researchers working in the field of social justice leadership in various disciplines social justice activists and advocates teachers policymakers politicians managers executives practitioners researchers academicians and students interested in how leaders of color can succeed navigate hostile spaces and ultimately create a change in mindsets and practices that will lead to justice

Management Theory and Practice

1998

when work began on the first volume of this text in 1992 the science of distribution management was still very much a backwater of general management and academic thought while most of the body of knowledge associated with calculating eqqs fair shares inventory deployment productivity curves and other operations management techniques had long been solidly established new thinking about distribution management had taken a definite back seat to the then dominant interest in lean thinking quality management and business process reengineering and their impact on manufacturing and service organizations for the most part discussion relating to the distribution function centered on a fairly recent concept called logistics management but despite talk of how logistics could be used to integrate internal and external business functions and even be considered a source of competitive advantage on its own most of the focus remained on how companies could utilize operations management techniques to optimize the traditional day to day shipping and receiving functions in order to achieve cost containment and customer fulfillment objectives in the end distribution management was for the most part still considered a dreary science concerned with transportation rates and cost trade offs expediting and the tedious calculus today the science of distribution has become perhaps one of the most important and exciting disciplines in the management of business

Project Management Under Internet Era

2013-09-21

recent advancements in information systems and computer technology have led to developments in equipment and robotic technology that have permanently changed the characteristics of manufacturing equipment equipment management in the post maintenance era advancing in the era of smart machines introduces a new way of thinking to help high tech organizations manage an increasingly complex equipment base it also facilitates the fundamental understanding of equipment management those in traditional industries will need to prepare for the emerging microchip era in equipment kern peng shares insights gained through decades of managing equipment performance using a systems model to analyze equipment management he introduces alternatives in equipment management that are currently gaining momentum in high tech industries the book highlights the fundamental internal flaw in maintenance organizational setup presents new approaches to replace maintenance functional setup and illustrates a time tested transformation and implementation process to help transition your organization from the maintenance era to the new post maintenance era fundamentally it breaks down the history of equipment into five phases provides a clear understanding of equipment management fundamentals and introduces alternatives in equipment management beyond the mainstream principles of maintenance management more specifically the book examines maintenance

management logistics including planning and budgeting training and people development customer services and management vendor management and inventory management supplying a comprehensive look at the history of equipment management it analyzes current maintenance practice and details approaches that can significantly improve the effectiveness and efficiency of your equipment management well into the future this second edition addresses the role of the development of the internet of things iot and significant advancements in artificial intelligence ai and machine learning ml in enabling a new generation of smart machines which have in turn laid the foundation for industry 4 0 equipment utilizing iot and sensors can monitor components and allow them to be serviced at an exact time without the need for a preventive maintenance schedule moreover equipment replacement rarely occurs at the end of the piece of equipment s natural life rather replacement is driven by the introduction of new technologies and products all of which lead to less maintenance activities and reduces the importance of the traditional maintenance function maintenance departments today operate with fewer employees and smaller budgets at a point when machines are smart enough to keep themselves running or equipment is rendered obsolete by better equipment in a short time such as with computers and cellphones companies do not need a maintenance department this updated edition reiterates the importance of transitioning to the post maintenance era to effectively manage today s sophisticated smart yet expensive equipment many changes the author predicted a decade ago are accelerating in the iot era equipment management is moving further away from the maintenance era and advancing deeper into the post maintenance era the trend for smart machines is very clear and companies that do not upgrade their equipment will lose their competitiveness as equipment and factories become smarter companies must change their practices and organizational structures to manage the new generation of equipment for industry 4 0
