this work is the first book length treatment on translation policy nearly everywhere in the world populations are multilingual and mobile consequently language policies developed by the authorities must include choices about the use or non use of translation this book recognizes that these choices or the absence thereof become policies of their own in terms of translation it builds upon the work of scholars in the fields of translation studies and language planning and policy in order to develop a new theoretical perspective on translation policy in essence the book proposes that translation policy can be understood as the management practice and beliefs surrounding the use of translation the book deals with these issues under european and international law and then explores such management practice and beliefs in the uk as a case study ultimately the reader can find a fuller appreciation of both the importance and complexity of translation policy
