the united states and 11 other countries from both sides of the pacific are currently negotiating the trans pacific partnership tpp the agreement is expected to set new benchmark for international trade through its comprehensive coverage of issues and binding

regulations it is expected to eventually mature into a regional trade agreement covering the entire asia pacific as of now it does not include china and india the two largest emerging markets and regional economies the tpp has generated controversy for its excessive emphasis on trade issues which have remained unresolved or unaddressed at the wto due to differences between developed and emerging markets it has also been criticized for adopting a negotiating style reflecting the us regulatory approach to international trade and also as a geo political strategy of the us for supporting its strategic rebalancing towards asia from both economic and geo political perspectives the tpp has various significant implications for china and india that are examined in the book this book sheds light on how china and india s entries in the tpp are mutually beneficial and how both countries can gain from the tpp by gaining preferential access to large markets and using it as an opportunity for introducing more outward oriented reforms the book also cautions that us must reconcile to the rebalancing of economic power within the grouping that will occur following the entries of china and india otherwise the tpp and china and india might walk divergent paths and trade and regional integration in asia pacific may not ever converge this book will interest anyone who wishes to learn more about the tpp and its future implications and challenges and china and india s roles in global and regional trade

the focus of this book is the judicial institutionalization of integration processes through the development of dispute settlement mechanisms more specifically in the common market of the south mercosur to date the most important regional bloc in latin

america the bloc has been in existence since 1991 and has positioned itself as one of the potential regional blocs for trade and investment while becoming one of the important actors in the international community however its achievements have been tainted by the gaps and problems attached to the core foundation of the regional bloc mercosur has been suffering or experiencing internal disputes and disunity due to its complex and low institutionalization a situation which can be seen as being paradoxical its current dispute settlement mechanism is subject to uncertainty and doubt since its own framework is also under internal and external criticism there has been a series of protocols made in order to tackle the problems of the dsu and to further fix the problems that hinder the cooperation as well as the productivity of mercosur's intra organisation all guided by intergovernmental decision making as such this book seeks to tackle the concept of regionalism and the possible models which have been used or have influenced the establishment of mercosur while discussing the different aspects and developments of each intra organisation this is done in order to evaluate the nature of the problem and future developments that could take place the book also focuses on the prevalence of politicization in mercosur and the pre-eminence of presidential diplomacy over the path of regional integration which influence the dsu of mercosur and possible developments that might occur in the near future

japan s unusual position in the realm of international politics encapsulates a three fold juxtaposition both in and out of asia both occupied by and a close ally of the united states and both a key trade partner and a strategic rival of china whilst international relations theory offers a number of ways to analyse these relations this book instead utilizes the concept of risk to provide an innovative perspective on japan s relations with china north korea and the us the book elucidates how risk potential harm and harm are faced disproportionately by certain groups in society this is demonstrated by providing an empirically rich analysis of the domestic implications of security relations with china north korea and the united states through the presence of us troops in okinawa beginning with a theoretical discussion of risk it goes on to demonstrate how the concept of risk adds value to the study of international relations in three senses first the concept helps to break down the boundaries between the international and domestic second the focus on risk and the everyday directs us to ask basic questions about the costs and benefits of a security policy meant to secure the national population third what implications do these two points have for governance the question is one of governance as japan s externally oriented security policy produces domestic insecurity shared disproportionately not equally as this volume makes

clear developing the theory of risk as a tool for understanding international relations this book will be of great interest to students and scholars of asian politics japanese politics international relations and security studies as well as to policy makers and practitioners working in the field

state formation after civil war offers a new model for studying the formation of the state in a national peace transition as an integrated national phenomenon current models of peacebuilding and state building limit that possibility reproducing a fragmented selective view of this complex reality placing too much emphasis on state building as design they place too little on understanding state formation as unplanned historical process the dominant focus on national institutions also ignores the role that cities and civic polities have played in constituting the modern state mining ideas from many disciplines and evidence from 19 peace processes including south africa the book argues that the starting point for building a systematic theory is to explain a distinct pattern to state

formation that can be observed in practice despite their conflicts people in fragile societies bargain terms for peaceful coexistence they make attempts to constitute the right to rule as valid state authority in circumstances prone to conflict over which they have imperfect influence not control though the kind of institutions created will differ with context how rules for state authority are institutionalized follows a consistent basic pattern that pattern defines state formation in peace transitions as both a unified if contingent field of normative practice and an object of comparative study where the national centric models see local government as a matter belonging to policy on decentralization for later in the reconstruction phase the book uncovers a distinct local government dimension to peace transitions a civic dimension to national conflicts that must be explained incipient or proto local authorities that emerge even during civil war in peace making after state collapse the fact that it is common for peace agreements and constitutions to include rules for local authority for local elections to be held as part of broader democratization and for laws to be enacted to establish local government as part of peace compacts the book develops the concept of local peace transition to explain the distinctive constitutive role of this local dimension in peace making and state formation this path breaking book will be of compelling interest to practitioners scholars and students of comparative constitutional studies international law peace building and state building
