here is an antidote to the talk about failing schools education reform test scores teacher value curricular controversies school choice it is about what counts a young person's self formation and a teacher's work to support it it's a quiet book an illustration of what happens as thoughtful students interact with sensitive adults its title letters of recommendation hints at the angst felt about getting accepted by college employer and the world at large but that angst hides the real challenge forming an aware purposeful sense of self letters of recommendation shows this pedagogical problem when all the externals are right emilia a girl who seemingly has it all asks an admired teacher doc for a letter of recommendation supporting early admission to a top college emilia withdraws the request beginning to doubt what she's doing and why and what she really wants in life doc senses her unease letters result back and forth through the school year with subtle attention to the girl's emerging sense of self and the teacher's presence both humane and professional the year ends the exchange stops life's externals appear settled for now with the larger questions deepened but still open as they always are letters offers no easy steps no how to's no magic methods instead it heightens awareness of what goes on as good education takes place it affirms a student's self reliance in the face of felt uncertainties and a teacher's trust that her presence as a full human person has value and meaning in the work of education the letters themselves do not exemplify an instructional method but serve to direct attention to the inner lives of a student and her teacher the letters create a thought provoking book a pedagogical dialogue and the dialogue's privileged setting does not celebrate the rich and famous it is a way to set aside the material complications
