it is common knowledge that televised political ads are meant to appeal to voters emotions yet little is known about how or if these tactics actually work ted brader s innovative book is the first scientific study to examine the effects that these emotional appeals in political advertising have on voter decision making at the heart of this book are ingenious experiments conducted by brader during an election with truly eye opening results that upset conventional wisdom they show for example that simply changing the music or imagery of ads while retaining the same text provokes completely different responses he reveals that politically informed citizens are more easily manipulated by emotional appeals than less involved citizens and that positive enthusiasm ads are in fact more polarizing than negative fear ads black and white video images are ten times more likely to signal an appeal to fear or anger than one of enthusiasm or pride and the emotional appeal triumphs over the logical appeal in nearly three quarters of all political ads brader backs up these surprising findings with an unprecedented survey of emotional appeals in contemporary political campaigns politicians do set out to campaign for the hearts and minds of voters and for better or for worse it is primarily through hearts that minds are won campaigning for hearts and minds will be indispensable for anyone wishing to understand how
