this is the story of gordon clark 1902 85 respected philosopher and prolific writer who held that christianity as a logically coherent system is superior to all other philosophies clark fought no wars and conquered no kingdoms yet he was a leading figure in many theological wars fought for the kingdom of god these battles for the minds and souls of men were every bit as crucial as physical wars between nations in an age of increasing secularization he put up an intellectual defense of the christian faith this faith he believed was a system all of its parts link together a luxury of no other philosophy his stance shows a christianity that is in fact intellectual not relying on appeals to emotion or experience in propounding this view he encountered frequent opposition not from the secular world but from within his own denomination this biography helps explain why his thought was so profound why resistance mounted against him and how his struggles impacted american presbyterianism additionally this book calls for a reappraisal of clark s views which have been maligned by controversy understanding and applying his views could significantly fortify christians combating irrational and non systematic ideas prevalent in today s churches
