*Questions and Answers: Criminal Law* 2023-01-31 assessment on college campuses has a sordid history and it is fairly simple to find someone with a traumatic tale to tell it is wise to respect that that reputation is deserved how do you modify the inner workings and culture of a massive institution with minimal resources and even less authority other than ge course approvals and thousands and thousands of talented people busy doing other things the road to departmental assessment can seem both dramatic and apocalyptic especially if one s departmental centre cannot hold and purpose falls apart the department of english and linguistics is presently on this journey slouching towards its own revelations of mission and fulfillment of purpose i have become more optimistic about the potential value of the process even if some of my initial skepticism remains this skepticism however has been valuable forcing me to think in more concrete ways about what i do in the classroom as these excerpts show this is no conventional book about assessment it presents the unvarnished first person accounts of

fourteen faculty and administrators about how they grappled and engaged with assessment and how despite misgivings and an often contentious process they were able to gain the collaboration of their peers as the benefits for student learning became evident this is a book for skeptical faculty for those who have been tasked to spearhead their institution's call to create a culture of assessment and on campuses where assessment has been widely accepted and implemented for those who now need to ensure this commitment will endure for all these audiences this book offers valuable advice strategies models and ideas
