Clyde S. Kilby is rare among the best expositors of C. S. Lewis, J. R. R. Tolkien and their circle of friends in that he became personally acquainted not only with Lewis and Tolkien but also Lewis's brother Major Warren Lewis, Owen Barfield, Lord David Cecil and others of the Inklings. He particularly captured the soul of C. S. Lewis in his lectures, articles and books which guided his vision in creating and curating the prestigious Wade Collection at Wheaton College, Illinois. This delightful book makes available Dr. Kilby's wide-ranging and inspiring take on Lewis, Tolkien and the affinities they shared with their circle, the Inklings, in their enchantment with profound thought, vibrant with imaginative wonder which took them beyond the walls of the world. this is the story of a system that failed utterly at almost every level and with fatal effect people died hundreds of others were made horribly sick and for days no one knew what was happening or why there were rumours about the water but the public utilities commission blandly assured callers that the water was okay which left investigators trying to figure out if the problem was tainted food or something else colin perkel was among the first reporters to visit walkerton when word finally got out that the water was poisoned using the interviews he conducted and the testimony given to the walkerton inquiry perkel has pieced together an authoritative and riveting account of the tragedy he tells the story from the point of view of the people who lived through it he shows how the virtues of a small town its closeness loyalty tradition and sense of community contributed to the disaster he shows how two brothers stan and frank koebel were sustained by those virtues despite their own limitations he provides a day by day account of the epidemic itself the moments of heroism and good sense and the instances of incompetence wilful blindness and plain stupidity a few heroes do emerge the pediatrician who was thoughtful and worried enough to raise the alarm the investigator who worked feverishly through a holiday weekend to find the source of the poison even perhaps the reporter at the local radio station who broadcast the boil water advisory neither the politicians at any level nor the bureaucrats in the department of environment and the health ministry come out very well but colin perkel never loses sight of the fact that this story is about real people and his account of what happened is always set in the context of the complicated lives of the people who lived through it there are no villains in this story but only flawed humans this is a superb piece of reporting it deals with a tragedy that might have occurred and might occur again in virtually any community in canada
