a fun dazzling exploration of the strange numbers that illuminate the ultimate nature of reality for particularly brilliant theoretical physicists like james clerk maxwell paul dirac or albert einstein the search for mathematical truths led to strange new understandings of the ultimate nature of reality but what are these truths what are the mysterious numbers that explain the universe in fantastic numbers and where to find them the leading theoretical physicist and youtube star antonio padilla takes us on an irreverent cosmic tour of nine of the most extraordinary numbers in physics offering a startling picture of how the universe works these strange numbers include graham s number which is so large that if you thought about it in the wrong way your head would collapse into a singularity tree 3 whose finite nature can never be definitively proved because to do so would take so much time that the universe would experience a poincaré recurrence resetting to precisely the state it currently holds down to the

arrangement of individual atoms and 10¹²⁰ measuring the desperately unlikely balance of energy needed to allow the universe to exist for more than just a moment to extend beyond the size of a single atom in other words the mystery of our unexpected universe leading us down the rabbit hole to a deeper understanding of reality padilla explains how these unusual numbers are the key to understanding such mind boggling phenomena as black holes relativity and the problem of the cosmological constant that the two best and most rigorously tested ways of understanding the universe contradict one another fantastic numbers and where to find them is a combination of popular and cutting edge science and a lively entertaining and even funny exploration of the most fundamental truths about the universe
