first published in 1999 making foreign people pay deals with the recovery of monetary claims in cross border legal relations and contains the results of a comparative empirical research of debt recovery procedures of three countries with different socio legal environments germany england and turkey in order to analyse judicial debt recovery of cross border claims court statistics and files have been evaluated the data show an infrequent use of the courts in all three countries it seems that legal efforts aiming at facilitating international procedures have not been successful but court procedures for the recovery of monetary claims are now to

a large extent interchangeable with what may be called privatised methods of debt collection including modern financial services such as factoring forfaiting and commercial debt collection empirical evidence shows that such privatization of debt collection is a strong trend in cross border debt collection the book is an empirical contribution to the ongoing discussion of globalization processes and describes an important field of the globalization of law

the green party evolved out of a number of protest movements of the late 1960s and 1970s and became a major political factor in the federal republic of germany in 1983 when it drew enough votes to send twenty seven members to the bundestag the author follows the party s rise from new social and ecological groups to its current place in the federal parliament and provincial legislatures he addresses the questions raised by green party members and by the unrest they have engendered whether they

believe in parliamentary democracy what effect their policy of replacing delegates in parliament at midsession will have on the parliament and the party and how they relate to germany s traditional political parties the answers to these and other questions form the background for an appraisal of the green party in which the author traces the development of its role from a political irritant to a factor of serious influence
