lectures on ecstatic temporality and on heidegger's political legacy in *Ecstasy Catastrophe* David Farrell Krell provides insight into two areas of heidegger's thought his analysis of ecstatic temporality in *Being and Time* 1927 and his political remarks in the recently published *Black Notebooks* 1931-1941 the first part of Krell's book focuses on heidegger's interpretation of time which Krell takes to be one of heidegger's greatest philosophical achievements in addition to providing detailed commentary on ecstatic temporality Krell considers Derrida's analysis of ekstasis in his first seminar on heidegger taught in Paris in 1964-1965 Krell also relates ecstatic temporality to the work of other philosophers including Aristotle Augustine Kant Schelling Hölderlin and Merleau-Ponty he then analyzes Dasein as infant and child relating ecstatic temporality to the mirror stage theory of Jacques Lacan the second part of the book turns to heidegger's *Black Notebooks* which have received a great deal of critical attention in the press and in philosophical circles notorious for their pejorative references to Jews and Jewish culture the *Notebooks* exhibit a level of polemic throughout that Krell takes to be catastrophic in and for heidegger's thought heidegger's legacy therefore seems to be split between the best and the worst of thinking somewhere between *Ecstasy* and *Catastrophe* based on the 2014 Brauer lectures in German Studies at Brown University the book communicates the fruits of Krell's many years of work on heidegger in an engaging and accessible style

this is the autobiography of Hedy Lamarr who is famous for two things first her movie career as she was regarded as the most beautiful woman in Hollywood she was also the first woman ever to appear nude in a movie second she is famous as an inventor a scientist and a researcher especially during the second world war as she developed and patented a method to defend against torpedoes and missiles she also developed an anti aircraft system where the anti aircraft fire would not hit the aircraft but would explode nearby nowadays in the aftermath of the shooting down of Malaysian Airline 17 over eastern Ukraine killing 298 passengers a new look is

being taken at the process developed by hedy lamarr the missile that shot down the malaysian airplane used a system similar to the one developed by hedy lamarr and the defense against torpedoes she developed might have applications to prevent future commercial aircraft from being knocked down
