this is the first full scale history of one of the largest farm tractor manufacturers of all time peppered with pictures of massey harris ferguson and massey ferguson's historic models collectibles sales memorabilia and advertisements from old farm magazines the big book of massey tractors tells the story of the mergers and machines that formed massey ferguson over several decades and because these machines dominated canadian farms for almost a century in many ways it also tells the story of canadian agriculture robert pripps a longtime tractor aficionado describes massey ferguson's battle with ford over dominance of the farm tractor industry a battle the company eventually won remarkably enough in view of its initial abject market failure with

tractors from the company's beginnings in 1891 to its 1953 merger with the Ferguson tractor company to its current ownership by Allis Gleaner Company. AGCO Massey's have played a large role in our agricultural history. The Big Book of Massey Tractors celebrates that role and showcases the machines that have helped turn the earth for over a hundred years.

The little grey fergie is Britain's best loved tractor, the light user friendly machine that finally replaced the horse on farms. This highly illustrated account covers the full history of Harry Ferguson's tractor products from his pioneering work before the 1930s to the merger with Massey in 1957. The author has had access to fresh archive material and has interviewed many of the surviving men who were associated with Ferguson. The appeal of the fergie lay in its lightness and utility and also in the system of mechanized farming of which it was a part. Throughout the book reference is made to the implements which lay at the heart of the system. Stuart Gibbard has won Tractor and Machinery Magazine's award for the best British tractor book five years running.

Following his well received books in this in detail series on the Ferguson TE20 and the Massey Ferguson 35-65 models, author Michael Thorne turns his attention to the outstandingly successful and well loved 100 series of tractors of the 100 range. The most popular was and remains the 135. Half a million 135s were built at Massey Ferguson's factory in Coventry alone with production overseas on top of this figure another

big success was the larger more powerful 165 with nearly 200 000 sold this model like the 135 is among the most popular and sought after classic tractors today although many 135s and 165s are still in active use around the world in spite of their age the 100 range included a great number of other models and in addition to the 135 and 165 which are given in depth treatment here important models described in detail are the 130 148 super spec 168 175 185 and 188 super spec there is an extensive chapter on the implements available for the range and another on conversions featuring 290 illustrations including detailed specially commissioned colour photography of outstanding examples of 100 series tractors massey ferguson 100 series in detail offers an unrivaled store of knowledge for the owners and enthusiasts who care passionately about these tractors and serves as a tribute to the people who made them

the international or multi national corporation has become an important phenomenon in today s business world and massey ferguson is an ideal example of such an organization through its predecessor companies it can train its history to 1847 and so it has encountered virtually all the difficulties and developments of the last hundred years in business organization and management science the development has not been straightforward for it has been much more than the growth of a single company in an expanding market management reorganization and the introduction of new management planning and control techniques contributed a good deal to the company s expansion and because mergers played a vital role the history of other companies is also involved dr neufeld s study concentrates on the years after the second world war a period in which the company s international operations became

increasingly complex he records the events that helped to shape the company's character and structure and at the same time investigates the company's successes and failures in adjusting to a changing national and international business environment his study reveals why Massey Ferguson developed into a global corporation an organization that considers the whole of the international environment when making decisions relating to the allocation of its marketing purchasing manufacturing and engineering activities
