## **Report of the New York State College of Agriculture at Cornell University, Ithaca, and of the Cornell University Agricultural Experiment Station 1916**

agricultural education remains fundamental to civilization it is the most consistent productive income of australia which is one of the world s very few net agricultural exporters victoria with only about three percent of the australia s area has been its major source of agricultural output these three factors underpinning civilization creating wealth and intensity in south eastern australia make victorian agriculture and its education of national importance and international significance the faculty of agriculture at the university of melbourne at times complemented by la trobe university and such colleges as burnley dookie gilbert chandler glenormiston longerenong marcus oldham and mcmillan has underpinned sustained rises in productivity and profitability but coordination and consistency have not always been its hallmarks this history reveals that agriculture at melbourne began amidst controversy grew to fame under a great dean at times rested on its laurels and others was dragged into organisational experiments its 22 deans over its 110 years typify the calling evident in its staff frequently a leader the faculty has recently strengthened its animal sciences by joining with the veterinary sciences but that is for a future history
